

# User's startup guide

## 1 Power on

Connect whiteboard to power supply, press the power key "⏻" on the lower left corner or the power key "🔌" on the remote control to turn on the whiteboard.

## 2 Whiteboard

On homepage, click "🖋️" to start the whiteboard function.

## 3 Screen share/mirror

Click EShare "📶" on homepage to start the screen share function. **Note:** The connected device and the whiteboard need to be on the same local area network for using screen share function. **Android device:** need to download the "Eshare" app. **IOS device:** open the iMirror/Airplay to cast the screen.

## 4 OS switch

Click the "Windows" or "OPS" to start windows OS; Click "Home" back to android OS

## 5 Shortcut tools

Click the arrows "⏪" "⏩" on both side opening the shortcut tools including file transfer, voter, screen recorder, timer, screen shoot, camera and so on.

## 6 Annotation

Click the arrows "🖋️" on both side starting annotation function.

## 7 More application

Click more applications "🗄️" for more installed APP.

## 8 Settings

Click setting "⚙️" to set up the network, time, language, sound, and other settings
